

# Site Carry Pouch

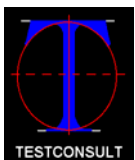

## Specification

Testconsult Equipment have now introduced a new site carry pouch, that can be used with all our site data acquisition units including:

- ✓ TDR2 Pile Integrity testing System
- ✓ TECO Pile Integrity testing system
- ✓ SIMBAT Dynamic load testing system
- ✓ LICCM Corrosion Meter
- ✓ BGCMap Corrosion Meter

The pouch is constructed from heavy duty padded nylon, which will protect your unit from knocks whilst on site, and keep your hands free for operating transducers. Construction features include a clear front panel allowing full use of keypad and viewing of screen, a fully adjustable strap with shoulder pad, taped seam construction and a separate flap to allow access to plug socket whilst the unit is in the pouch.
